Textiles

Wellness Products

Natural products are the basis of our life, even in a technology-dependent world. You process these products daily. We can support you in the smooth operation of your added-value chain – with high-quality wearing parts and machines with a perfect-fit and a long service life. We will look after you. Customer orientation and customer support is the force that drives

us to realize efficient, economical and ecological system solutions. You can rely on us - to give advice and deliver. Our corporate objective is the building of long-term customer relationships that will produce for you a noticeable increase in efficiency and quality in the production area. We operate worldwide for our customers – call on us!

KEK COTTON – THE VERSATILE NATURAL PRODUCT

The cotton plant (*Gossypium*), of which there are 290 different species, belongs to the mallow (*Malvaceae*) family. The cotton plant needs about 200 rain-free days and about 500 mm of rainfall during the year until the ripening of the fruit. It is used as a whole plant. The Egyptians discovered it as early as 12,000 BC and cotton clothing dating back 7,000 years was found in caves in Mexico. The cotton plant is not only used to obtain fibre for textiles but also cellulose from the linter and food oil from the cottonseed.

FROM WEARING PARTS TO MACHINES

Strainer cage of an oil press with extremely wear-resistant replacement parts.

The value retention of your machines is an important component for cost reduction in your company. Regardless of whether you need wearing parts or oil presses for cold pressing, we will serve you with the

Pressing element of an oil press.

highest quality and competence. Our product range will be orientated exactly to your requirement – we will work with you to develop the technological answer to your need.

KEK OIL PRESSES FOR COLD PRESSING

Cold pressed oils are unrefined oils and therefore have a greater vitamin and mineral content than hot-pressed refined oils. They have a broad range of use, as basis for bath or massage oil or cream, as edible oil or for the manufacture of engine fuel, natural pesticides or pharmaceutical products. They are also used as high-quality salad oil because their flavour is determined by the used oil seed; hot-pressed oil is rather tasteless in comparison.

NATURAL PRODUCTS MUST BE HANDLED WITH CARE...

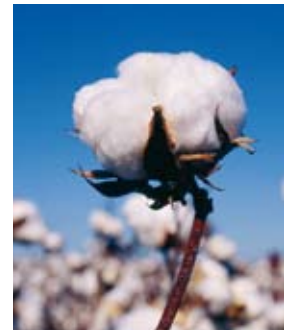

Alternative Energy

Professional Storage

Organic Rape Cultivation

Allergy-free Raw Materials

The ecological awareness of society is growing and thus also the demand for natural cosmetic and wellness products and for renewable energy. We ensure an organic quality and environmentally friendly

processing – for the production of textiles of the highest quality, for the prevention of allergies and as an answer to the growing demand for natural products.

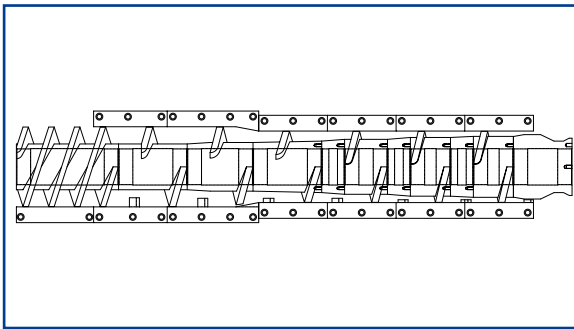

KEK PLANT OIL BASED ORGANIC DIESEL

Biodiesel is manufactured from renewable raw materials, is almost sulphur-free and its combustion produces about the same amount of CO₂ as the plant absorbed during its growth. This fuel is also rapidly biodegradable, has a high lubricity and is thus an environmentally friendly alternative to conventional fuels. Organic diesel has been gaining an increasing share of the fuel market during the last 15 years. The conversion of rape oil to biodiesel also produces by-products like glycerine, which is used in the pharmaceutical industry, in the plastics and paint industries and for keeping tobacco moist.

EXCELLENT INTERNATIONAL SERVICE – KEK IS THERE WHERE YOU NEED US

Engineering

KEK sees service as being a service with comprehensive customer orientation. We achieve this through direct customer contact – because we store, maintain and travel worldwide (e.g. stocks in Germany, USA, Turkey, Australia, Brazil, Argentina).

Service / Maintenance

We engineer solutions adequately according to customer wishes; flexibly, personally and timely. Excellent service at (almost) any time at (almost) any place ensures your completely successful investment in KEK products.

KEK WORLDWIDE STOCKING

The warehousing, as an important part of the logistics management system, contributes to cost optimisation and production flexibility. KEK's high level of capital tied-up in warehousing ensures both the short-term delivery and the associated cost savings. Regardless of which part you need in stock – we will supply you with optimum products in optimum condition. And KEK warehousing also means a safe packaging and a professional transport – worldwide.

MANUFACTURER COMPETENCE GOING BACK MORE THAN 50 YEARS

The Remscheid facility: logistics, manufacturing and sales

As a family-managed business with lean structures, we do not just serve our customers with our 50 years of 'manufacturer competence'. We are also represented internationally. With two factories in Remscheid, where it all began, and renowned, reliable suppliers, we always deliver what we promise. Our significant commitment in research and development demonstrates our interest in innovations and tailored customer-specific solutions.

Using the know-how from our tradition and looking permanently towards the future, we want to continue to be the first choice for our customers when they are seeking advice or a manufacturer of high-quality wearing parts and machines.

KEK COLD-PRESSED SPECIAL OILS

In our laboratory department, we test exotic seeds (e.g. Jojoba, shea butter, pepper seed, hemp, grape seed, mustard, borage, black cumin, etc.) for different applications for our customers in order to ensure a gentle pressing for highest quality. The application possibilities are as numerous as the plants themselves.
